Professional Summary

Full Stack Developer with **1.4+ years** of experience building scalable web applications and data integration systems using **React, Node.js, and TypeScript**. Proven track record in optimizing API performance (40% latency reduction), architecting real-time systems serving **1,000+ daily users**, and delivering pixel-perfect UIs. Experienced in fault-tolerant backend workflows, EDI data transformation, and integrating ERP/WMS systems.

Skills

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, Tailwind CSS, SCSS, Zustand, Redux, ShadCN UI, TanStack Query

Backend: Node.js, Express.js, tsoa, Swagger, Prisma, RESTful APIs, GraphQL, Socket.IO

Databases & Cloud: PostgreSQL, MySQL, MongoDB, PgVector, Azure Blob Storage, Redis

Infrastructure & Tools: Docker, GitHub Actions (CI/CD), Temporal, JSONata, Git, JIRA, Postman, Cursor, Claude Code, Ollama

Experience

Associate Software Engineer, Topgrep Tech – Bengaluru, Karnataka Sep 2025 – Present

- Optimized complex SQL queries and Prisma ORM operations, reducing execution time by **30%** and API latency by **40%** (68ms → 36ms), directly improving product responsiveness.
- Built reliable **SFTP/FTP pipelines** and a **JSONata-based transformation engine** for large-scale EDI data mapping across ERP/WMS integrations.
- Developed strongly typed **REST APIs** with auto-generated Swagger docs via **tsoa**; implemented **Temporal workflows** for fault-tolerant, long-running processes.
- Integrated external **ERP/WMS systems** via REST and GraphQL, standardizing data synchronization across platforms.

Software Development Engineer I, Salesken.ai – Bengaluru, Karnataka Jan 2025 – Sep 2025

- Owned the **frontend architecture for the Telephony team**, achieving **Lighthouse scores of 80+** on a complex, data-heavy dashboard.
- Built **8–10 reusable components** with memoization, lazy loading, and virtualization – reducing unnecessary re-renders by **~40%**.
- Implemented a **real-time notification system** with Socket.IO serving **1,000+ daily active users** with instant cross-device updates and zero message loss.
- Engineered state management using **Zustand, Redux, and Context API**; built advanced reporting tables with **React Table** and efficient caching via **TanStack Query**.
- Delivered **Figma-accurate UIs** using ShadCN UI and Tailwind CSS, accelerating design-to-production cycles.

Projects

Local AI Chat App *Next.js, Ollama, TypeScript, Tailwind CSS* [GitHub](#) | [Live Demo](#)

- Built a **full-stack local AI chat application** using Next.js (App Router) with co-located frontend and API routes – deployed on Vercel with seamless cold-start performance.
- Integrated **Ollama** for on-device LLM inference with **streaming token responses**, rendering markdown output in real time using a custom renderer.
- Implemented **multi-session chat persistence** with localStorage, supporting independent conversation histories with full CRUD management across sessions.
- Designed a **concurrency queue system** to handle simultaneous LLM requests gracefully, preventing race conditions and improving throughput under load.

Education

B.Tech in Electrical and Electronics Engineering Dec 2021 – Jul 2024
Acharya Nagarjuna University, Guntur

Diploma in Electrical and Electronics Engineering Jun 2018 – Apr 2021
Aditya Engineering College, Surampalem
